

# HELIX ENERGIZER™

# The Story

Four years ago, we began the process of designing a series of water devices that took advantage of the more natural ways that true wild organic water structures itself. In this way, everyone could experience this new structuring technology in their own homes, and do it in a cost effective and easy-to-install method.

Natural based water flow movement that results in industrial-frequency pattern erasing and positive natural frequency imprinting were the goals of the design. Because of our twelve-year experience (since 2007) in designing and manufacturing energizing water equipment we also knew that these devices had to be inexpensive and very watertight under higher-than-normal water pressure.

This past decade, for the first time, the latest magnetic and resonance-reading technology allows us to see many of the hidden relationships that water has to itself. We can compare molecular positioning and structuring. We're also beginning to learn about how frequency and consciousness alter water. We can now even see just how very different the body's Bio-water structural patterns are in healthy cells versus diseased cells.

HELIX LIFE

# Are **You** Dehydrated?

Water is the most fundamental and sustaining element of life, and something we simply cannot live without. Every bodily function depends upon water. So it only makes sense that drinking adequate amounts of water – and more importantly, drinking the right kind of water – is truly the cornerstone of good health.

# THE PROBLEM

75% of Americans are chronically dehydrated and also overly acidic despite drinking plenty of fluids. The reason is, most of the beverages (and many water types) being consumed by most people are NOT hydrating and alkalizing to the body. Most available are simply NOT good substitutes for clean, truly energized water. Not only that, tap water, well water, and bottled waters often contain harmful contaminants that create additional health concerns.

## DANGERS OF DEHYDRATION

Chronic cellular dehydration leaves the cell walls weakened and vulnerable to illness, premature aging and disease. Dehydration – even mild cases – has been linked with lack of diet control, obesity, increased cancer risk, kidney stones, heart attack, stroke, asthma, hypertension, ulcers, allergies, acid reflux, diabetes, and arthritis.

\*These statements have not been evaluated by the Food and Drug Administration.  
This product is not intended to diagnose, treat, cure, or prevent any disease.

# The Simple **Solution**

## Drink More **Water**

The obvious solution for the prevention of dehydration is regular water intake. It's ironic that a feeling of thirst means you are already dehydrated. Avoid dehydration by consuming waters throughout the entire day before you feel thirsty. Helix Life's new proprietary Energized Media Solution™ allows you to create alkaline, antioxidant, micro-clustered water at home. This water closely mimics the water found in nature's "best" healthy water sources. Introduced in 2010, this unique technology makes healthy, imprinted and micro-clustered water truly affordable! Of equal importance, Helix Life's all new, high pressure, "direct connect" built-in technology makes the under counter installation simple, fun, and easily accomplished by every homeowner. The system even comes with its own installation wrench.

# Completely Unique

## Ultimate High Pressure Filtration System

The Helix Energizer Kitchen model uses state-of-the-art proprietary filtration technology that reduces disinfection additives and other common contaminants for city/ municipal water or by choosing biofiltration, offers extreme bio contaminant reduction for well water and groundwater supplies.

## Energized Antioxidant Media Technology

Helix Life's Energy Cartridge uses proprietary blends of rare materials including far infra-red clay encased gemstones, specialized minerals and other ingredients to add frequency, negative electric charge and other health promoting qualities to the finished drinking water. The secret formulas of The Helix Life product developers have been used by thousands of medical practitioners and clients across the globe since 2010.

A background image of an older man with a white beard, wearing a blue denim shirt, drinking from a clear glass. He is in a kitchen setting with a bookshelf and a potted plant visible in the background. The image is overlaid with a semi-transparent dark grey layer.

# ENERGY FREQUENCY & STRUCTURE

The Helix Energizer Kitchen model uses state-of-the-art proprietary filtration technology that reduces disinfection additives and other common contaminants for city/ municipal water, or by choosing biofiltration, offers extreme bio contaminant reduction for well water and groundwater supplies. The Helix Energizer Kitchen model uses state-of-the-art proprietary filtration technology that reduces disinfection additives and other common contaminants for city/ municipal water or by choosing biofiltration, offers extreme bio contaminant reduction for well water and ground water sources.

# Simple Installation

The unique high-pressure design of the Helix Energizer™ system allows for speedy and simple installation directly into the cold water supply loop that is located underneath all kitchen sinks. Two sections of standard stainless steel compression plumbing tubes are included with the system.

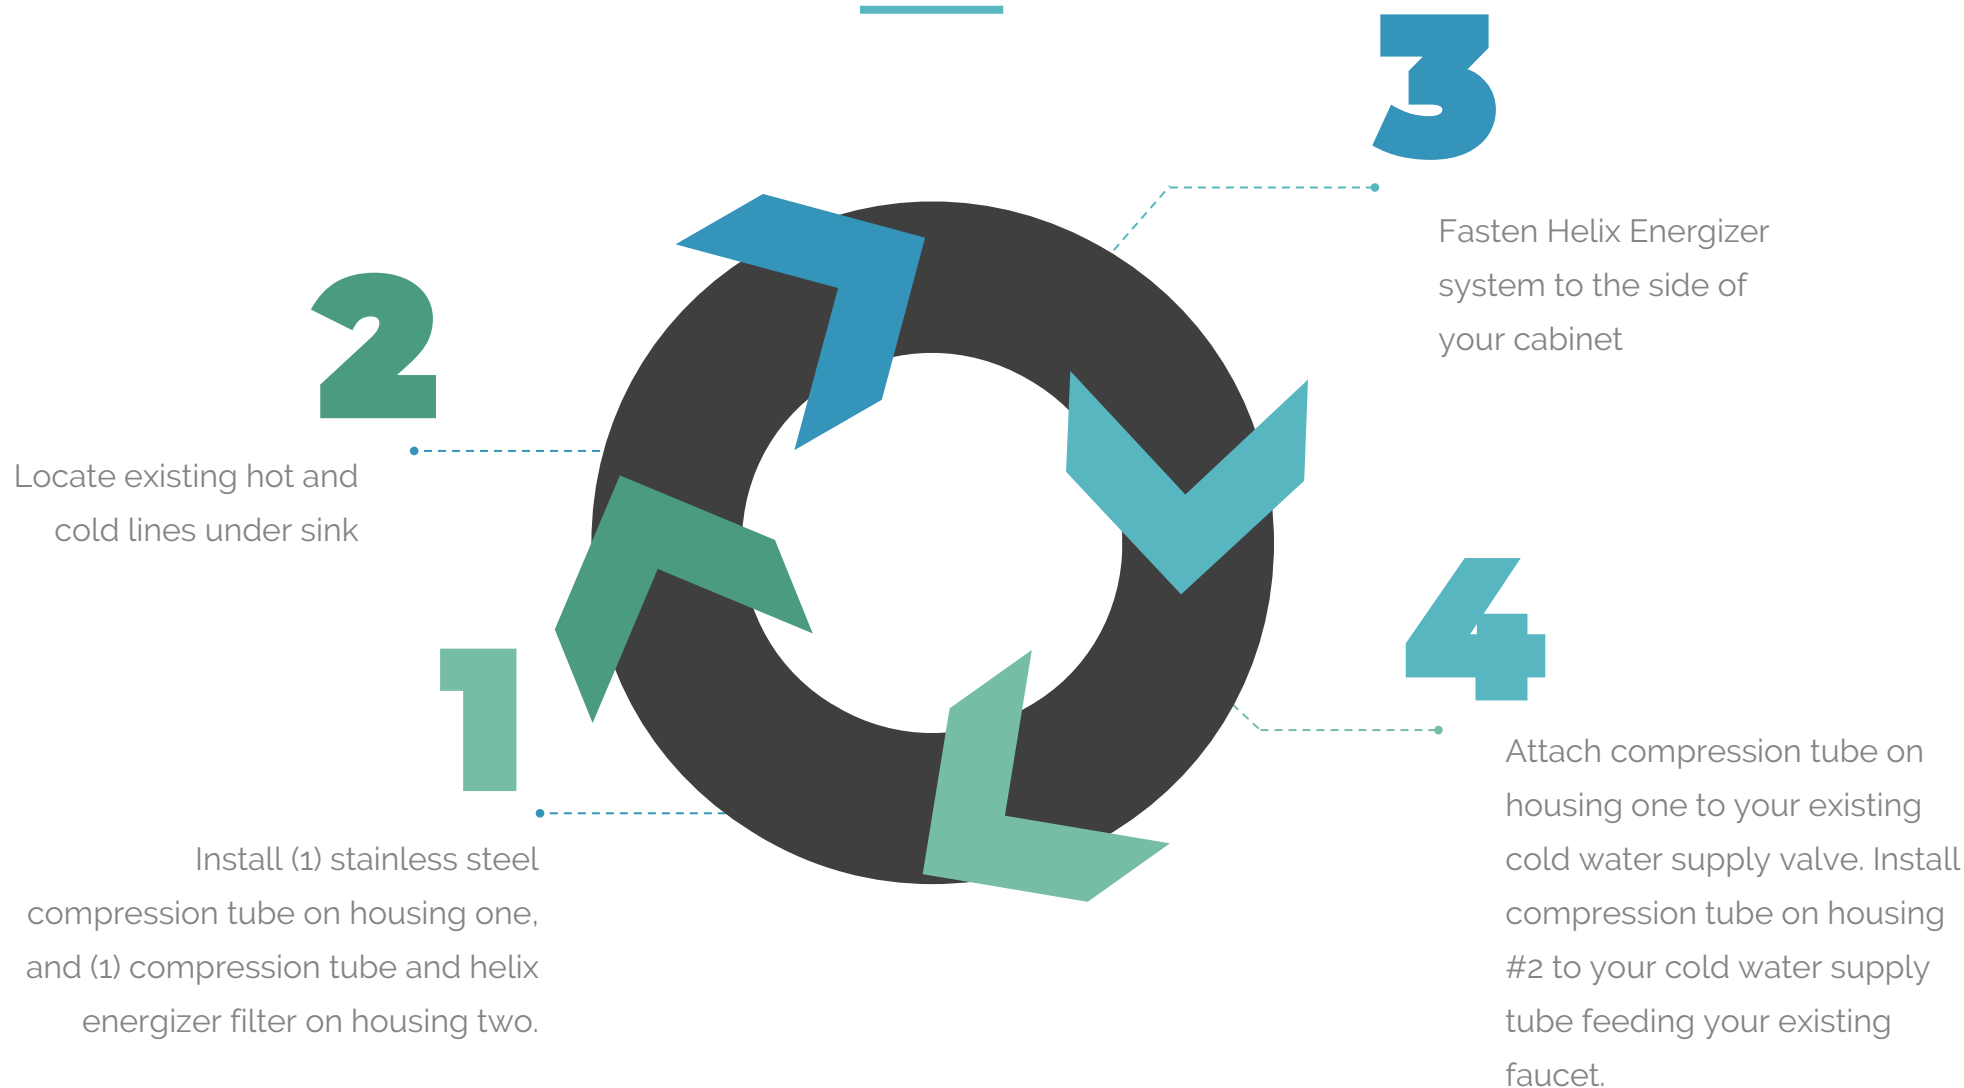

Most undercounter water systems require the installation of a separate water filter delivery faucet with is often objectionable to the latest sink and faucet designs. In addition, typical systems' installation may require the help of an outside mechanic or plumber and the Helix Energizer™ system can be easily installed by the homeowner using the supplied mini sized adjustable crescent wrench.

# Simple & Speedy Installation

# All Water Is Not Created Equal

---

## Tap Water

Every municipal water supply in America has been found to contain dangerous chemicals, additives, pharmaceuticals, toxins and contaminants. And, if your water supply becomes tainted... you're in trouble!

## Well Water

Well water is unregulated and may contain serious contaminants including microorganisms such as bacteria, viruses, and parasites, uranium, radium, radon, nitrates, nitrites, heavy metals, fluoride, fertilizers, pesticides, and harmful chemicals from industrial and household wastes.

## Bottled Water

Some bottled water is just reprocessed tap water, and some contain added sugar and sodium. Bottled water also poses the risk of toxic "outgassing" when chemicals leach from the plastic bottle into the water, creating health issues resulting from chemical exposure. Moreover, landfill waste limitations and the carbon footprint generated to create the plastic and transport the water bottles are of serious concern to many.

# All Water Is Not Created Equal

---

## **Water Pitcher Filters**

These cheap products often have very tiny onboard filters that do nothing more than lightly filter the water

## **Reverse Osmosis**

Reverse Osmosis is the best method for extracting contaminants without electricity. However, left in its common form, the highly purified water is stripped of essential minerals and energies, and may pose a threat to the health of bones and teeth.

## **Distilled Waters**

Like Reverse Osmosis, Distilled Water is stripped of essential minerals and natural structural energies. Distillation is also a very slow process which requires excess energy, and creates added heat and humidity.

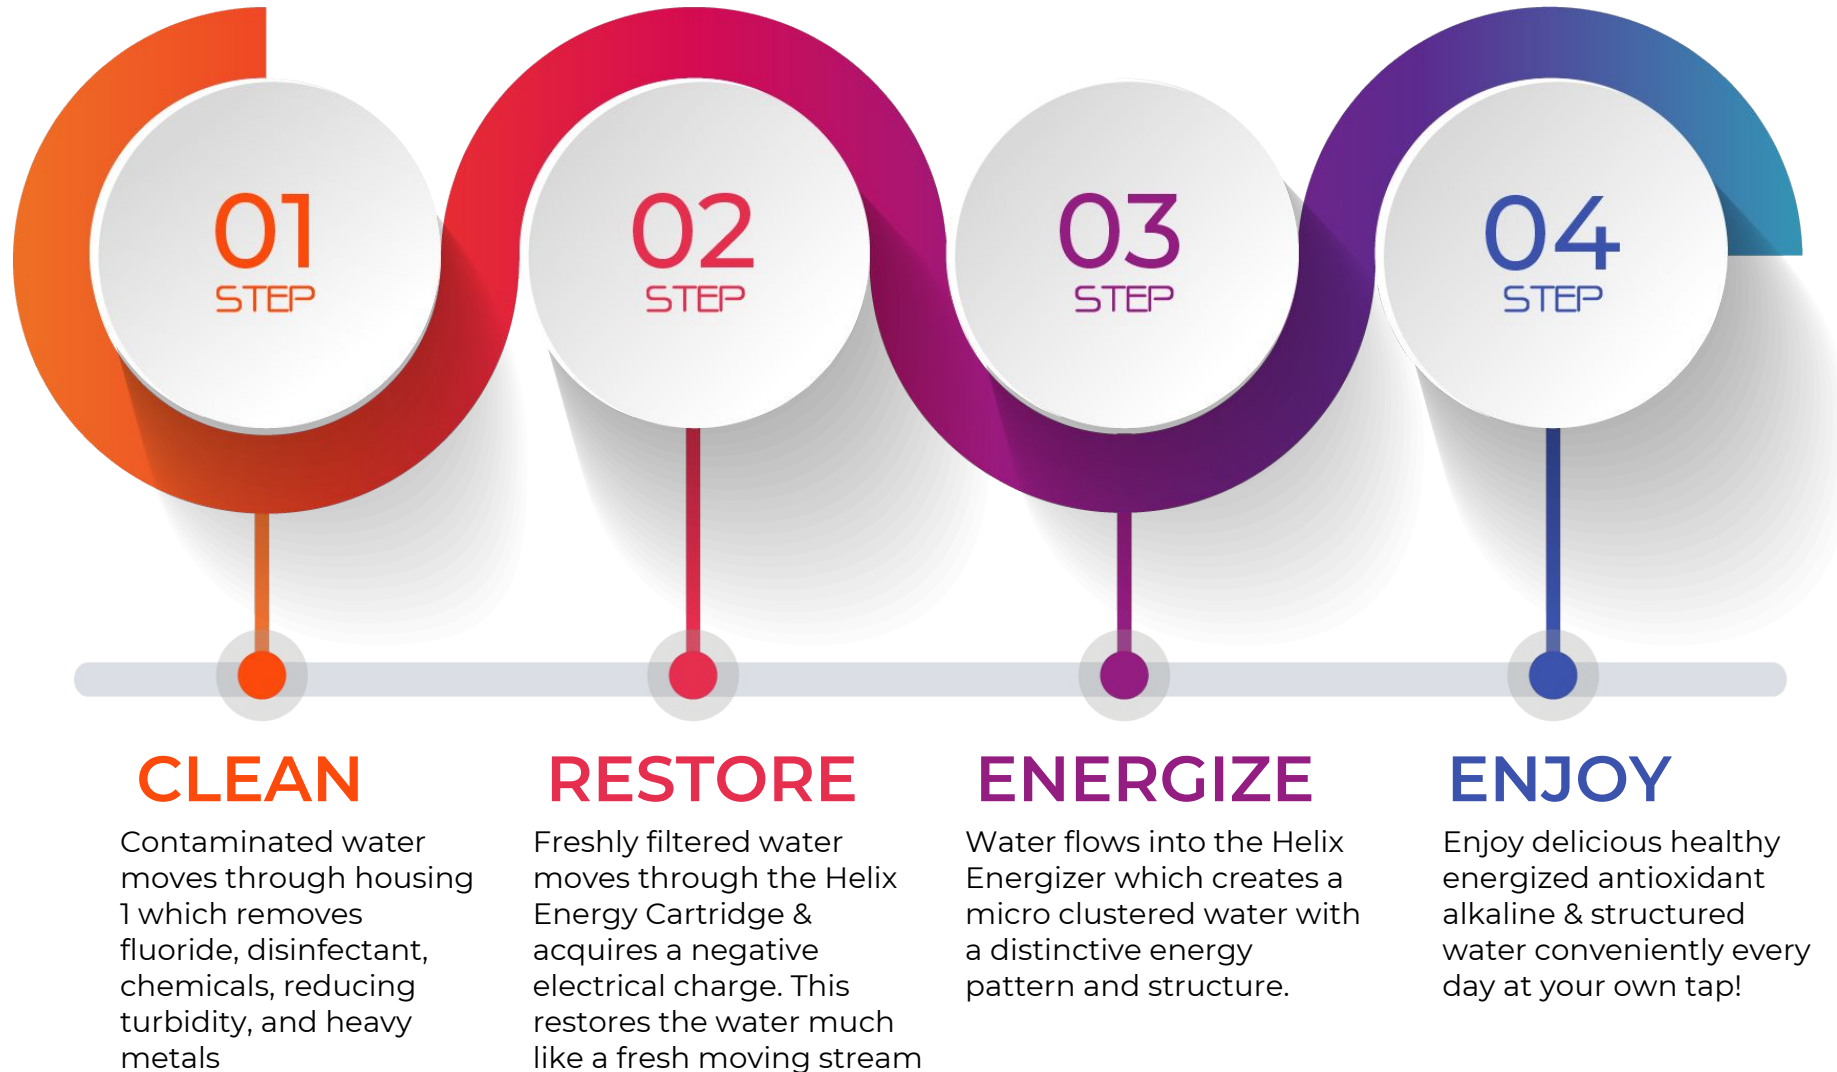

## **Naturally Occurring Alkaline Waters**

The water found in nature's famous healing Meccas is a known factor in health and longevity. The longest lived and healthiest populations on earth drink the naturally energized alkaline water in places such as Lourdes, France, Vilcabamba, Ecuador, and Hunza Mountains.

# How it Works

# HELIX ENERGIZER<sup>TM</sup>

## Features & Specifications

# Helix Energizer Kitchen Model

## Features and Specifications

### No Electricity Needed

Works when you need it to!

### Revolutionary Energized Media

the proprietary media itself creates the water's energy shift. Helix Life's "Helix Energy Cartridge" creates micro clustered, antioxidant alkaline water!

### Configured to Meet Your Needs

Proprietary Municipal Filter for Treated City Water and available BioProtect™ Filter for Well Water and objectionable ground water sources.

### Enhanced Filtration Capability

domestic array (Muni Filter) reduces Fluoride, Chloramines, Chlorine, chemical and pharmaceutical contaminants. Well water version reduces many organic and biological contaminants.

### Significant Value & Savings

Up to 500% lower cost than other alkaline water systems.

# Housing #1

## Filtration Options

### Option 1- for City Water

The Helix Life Muni Filter Cartridge™ comes standard in Housing #1 of the Helix Energizer™ Kitchen configured for city/ domestic supply water use. It was designed to greatly reduce chemical contaminants typically found in Municipally operated domestic water supplies. The filters may contain proprietary blends of the following media:

Helix Life

Activated Carbon Blend comprising: Organic Coconut shell carbon, centaur carbon, bamboo carbon and highly activated acid washed carbon merge. Reduces and removes VOC's, MTBE's, herbicides, pesticides, chlorine and chloramines.

KDF-55 / KDF-85 Carbon Blend: Is located after the Activated Alumina to block any AA residue from getting into the finished drinking water. Additionally, KDF blends can remove or reduce up to 99% of hydrogen sulfide, cadmium, lead, mercury nickel, chromium and other dissolved metals. The build-up and control of chlorine, chloramines, fungi and bacterium can also be realized with the use of KDF Blends.

Activated Alumina: A very unique ceramic compound, Activated Alumina is made from Aluminum Oxide, the same chemical substance as the gem stones sapphire and ruby.

# Housing #1

## Filtration Options

### Option 2 for Well & Ground Water

(available at \$29 upcharge)

The very unique and proprietary Helix Life Bio-Protect™ Filter™ cartridge comes ready to protect you from a variety of objectionable contaminants. The 99% micro-biologically pure solution! Its NASA derived technology has been tested to reduce or remove up to 99% common biologic contaminants for bacteria, viruses and cysts.

The BioProtect™ proprietary filter media features a thermally bonded blend of microglass fibers and cellulose infused with nano-fibers in a non-woven matrix that creates an electro positively charged depth filter media capable of holding and blocking large amounts of residual contaminants.

HELIX LIFE

# Housing #2

## The Helix Life Energy Cartridge

Helix Life's Energy Cartridge uses proprietary blends of rare materials including far infra-red clay encased gemstones, specialized minerals and other ingredients to add frequency, negative electric charge and other health promoting qualities to the finished drinking water. The secret formulas of The Helix Life product developers have been used by thousands of medical practitioners and clients across the globe since 2010.

## Continued

The very specialized and exacting materials used in the Helix Life Energy Cartridge greatly intensify the pH of the finished water while at the same time decreasing the Water's Oxidative Reduction Potential (ORP). A negative ORP level in the water helps to demonstrate that the newly formed alkaline antioxidant water also has a much smaller water molecule clusters (micro-clustering effect) and can also help to hydrate the body more effectively than bulk tap water or purified bottle water.

The Energy Cartridge also completes the new healthy energy water using Helix Life's proprietary carbon finishing blend for improved taste and famous "silky-smooth" texture.

# Helix Energizer

## How it works

The proprietary device re-structures the water that flows through it, and accomplishes this with no moving parts, no consumable components to replace, and with rock-solid durable construction.

While the water is vortexed into a double helical flow pattern, it also passes through an energy chamber comprised of magnets, very specially sourced crystal media, and other rare earth energy materials that will imprint the vortexed water with key natural frequencies known to promote the body's own healing and wellness functions. These serve to break down large unstructured and random groupings of water molecules (also called clusters), into smaller more symmetrically and naturally arranged clusters that exhibit the properties of more organically wild water.

What this can mean for us is increased hydration, imprinted water with more natural and holistic healthy frequencies, and greater wellness potential overall. Further reported results include increased energy, better digestion, weight loss, improved taste and texture enhancement. Many have also reported increased growth in agriculture and plants. And, of course, pets often prefer drinking energized and structured water over other tap or purified waters.

# Helix Energizer Specifications

---

- The Helix Energizer™ Under the Counter Kitchen model main unit measures 12" wide by 16" high and 5- 1/4" deep when mounted on its included bracket.
- Solid and sturdy construction
- Reduces Bacteria, Viruses, Cysts and other contaminants (well and groundwater configuration)
- Reduces potentially harmful chemicals (city water configuration)
- Unique High-Pressure Flow-through design can be installed using included parts directly to your existing kitchen faucet.
- Optional dispensing faucet is available separately for additional cost, if desired.
- Creates Alkaline Antioxidant Energized Structured Drinking and Cooking Water.
- Two Helix Life Energizer™ Specialty Filter Cartridges are included. (replace set every 8-12 months)
